WHAT IS CRYPTOCURRENCY?

Cryptocurrency, or crypto, is a digital currency that is not controlled by a central authority, such as a bank or government. It's a decentralized, encrypted medium of exchange that uses cryptography to verify transactions and secure records. Cryptocurrencies are digital tokens. They are a type of digital currency that allows people to make payments directly to each other through an online system. Cryptocurrencies have no legislated or intrinsic value;

HISTORY AND **EVOLUTION**

The first cryptocurrency was created by Satoshi Nakamoto, the pseudonym for an anonymous computer programmer or group of programmers, on January 3, 2009, when Bitcoin software was made available to the public. The software would release some 21 million Bitcoins after its release to the public. The global cryptocurrency market size was valued at USD 910.3 million in 2021 and is projected to reach USD 1,902.5 million in 2028, exhibiting a CAGR of 11.1% during the forecast 2021-2028.
